I found when comparing years of experience to salary there's a positive relationship which is supported by the heat map where you can see that the p-value is 0.62 which is higher than 0.5 meaning this relationship is significantly positive.

When comparing age to salary there's also a positive relationship which is supported by the heat map where you can see that the p-value is 0.66 which higher than our last value of 0.62 meaning this relationship is a little more significantly positive.

Average Salary by Industry

This graph shows that there is a difference of almost 15 thousand between technology industry and healthcare industry.
